

1. Students

Scale: 5 = Outstanding; 4 = Excellent; 3 = Good; 2 = Average ; 1= Below Average

1. **Quality of Teaching:** Regarding Quality of teaching the overall feedback obtained is above 60%, therefore it was decided of providing additional training or resources for teachers to improve their teaching methods. The feedback from students indicated that they found the teaching to be engaging and informative, but there were still areas for improvement. By offering additional training and resources, we hope to see an increase in student satisfaction and performance. This investment in our teachers will ultimately benefit the students and contribute to the overall success of our educational programs.

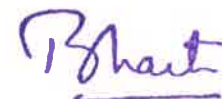

2. **Course Material:** From the analysis majority of students feels course content is satisfactory. If students are not satisfied with the course material, it may need to be updated or supplemented with additional resources. It is important to regularly review and update course material to ensure that it remains relevant and effective in meeting the educational needs of students. By listening to student feedback and making necessary adjustments, we can ensure that our educational programs continue to provide value and support student success. In doing so, we can create a positive learning environment that fosters growth and achievement for all students.

3. **Examination Methodology:** From the analysis majority of students feel examination methodology is effective. If students feel the examination methodology is not effective, it might be worth reviewing the examination process and making necessary adjustments. This could include changing the format of exams, providing more study materials, or offering additional support for students who struggle with testing. By addressing any concerns with the examination methodology, we can help students feel more confident in their abilities and ultimately achieve better results. This proactive approach will ultimately contribute to the overall success of our educational programs and the students we serve.

4. **Student Engagement Activities:** The feedback regarding student engagement activities is above average. If the feedback is low, consider introducing more interactive and engaging activities. These activities can include group projects, hands-on experiments, field trips, or guest speakers. By incorporating a variety of engaging activities into the curriculum, students are more likely to stay interested and motivated to learn. This will not only improve their overall academic performance but also

enhance their overall learning experience. Ultimately, creating a dynamic and interactive learning environment will lead to higher levels of student satisfaction and success.

5. **Infrastructure and Laboratory Facility:** From analysis mixed reponse on Infrastructure and laboratory facility is obtained. Negative feedback in this area could indicate a need for improved facilities or equipment. Positive feedback, on the other hand, suggests that students are satisfied with the resources available to them for hands-on learning experiences. Upgrading infrastructure and laboratory facilities can significantly impact the quality of education provided to students, leading to better understanding and retention of concepts. Investing in these areas can ultimately contribute to the overall success and reputation of the educational institution.

1. **Quality of Teaching:** With over 70% positive feedback, the focus is on enhancing teaching quality. We plan to offer additional training and resources to teachers, aiming to refine their teaching methods. This strategy is expected to boost student satisfaction and performance, thereby enriching our educational programs.
2. **Course Material:** The majority of students find the course content satisfactory. However, to cater to all students, we plan to regularly update and supplement the course material based on student feedback. This approach will ensure our educational programs remain relevant, effective, and supportive of student success.
3. **Examination Methodology:** Most students find the examination methodology effective. For those who don't, we plan to review and adjust the examination process. This could involve modifying exam formats, providing more study materials, or offering extra support for students who find testing challenging. This strategy aims to boost student confidence and performance, contributing to the success of our educational programs.
4. **Student Engagement Activities:** Feedback on student engagement activities is above average. To further enhance student interest and motivation, we plan to introduce more interactive activities such as group projects, hands-on experiments, field trips, and guest speakers. This dynamic and interactive learning environment is expected to improve academic performance and enhance the overall learning experience.
5. **Infrastructure and Laboratory Facility:** The feedback on infrastructure and laboratory facilities is mixed. We plan to invest in upgrading facilities and equipment based on the feedback. This investment will significantly enhance the quality of education, leading to better concept understanding and retention among students. Ultimately, this will contribute to the success and reputation of our educational institution.

1. **Quality of Teaching:** The overall feedback on the quality of teaching is above 60%. For areas of improvement, we plan to provide additional training or resources for teachers to enhance their teaching methods. This initiative aims to increase student satisfaction and performance, ultimately benefiting the students and contributing to the success of our educational programs.
2. **Course Material:** The majority of students find the course content satisfactory. For those who are not satisfied, we plan to update or supplement the course material with additional resources. Regular review and update of course material will ensure its relevance and effectiveness in meeting students' educational needs.
3. **Examination Methodology:** The majority of students find the examination methodology effective. For those who find it ineffective, we plan to review the examination process and make necessary adjustments. This could include changing the exam format, providing more study materials, or offering additional support for students who struggle with testing.
4. **Student Engagement Activities:** The feedback on student engagement activities is above average. For lower feedback, we plan to introduce more interactive and engaging activities. These activities can include group projects, hands-on experiments, field trips, or guest speakers. By creating a dynamic and interactive learning environment, we aim to improve students' academic performance and enhance their overall learning experience.
5. **Infrastructure and Laboratory Facility:** We received mixed responses on infrastructure and laboratory facilities. Negative feedback could indicate a need for improved facilities or equipment. For positive feedback, we plan to maintain the resources available for hands-on learning experiences. Upgrading infrastructure and laboratory facilities can significantly impact the quality of education provided to students, leading to better understanding and retention of concepts.

6. **Course Inputs:** The feedback from parents is satisfactory. For those who find it lacking, we plan to maintain our course inputs. This feedback loop between educators, students, and parents is crucial in ensuring that educational programs are meeting the needs of the workforce.
7. **Focus on Skill Development/Employability/Entrepreneurship:** The feedback from parents is satisfactory. For those who find it lacking, we plan to continue our focus on skill development, employability, and entrepreneurship. This positive feedback is a testament to the dedication of the educators and curriculum developers who have worked tirelessly to ensure that the course is meeting the needs of both students and potential employers.
8. **Course Updates Understanding in the Field:** The highest rating in this area suggests that the course is successful in updating understanding in this field. We plan to continue to maintain this. By staying current with industry trends and technologies, students are able to graduate with the most up-to-date skills and knowledge.

1. **Quality of Teaching:** With a feedback score above 60%, we are inspired to further energize our teaching methods. We plan to provide additional training and resources for teachers, sparking innovation in their teaching methods. This vibrant approach aims to increase student satisfaction and performance, ultimately benefiting the students and contributing to the overall success of our educational programs.
2. **Course Material:** The majority of students find the course content satisfactory. However, we believe in the power of continuous improvement. We plan to update or supplement the course material based on student feedback, ensuring that it remains relevant and effective. This energetic approach to curriculum development will foster growth and achievement for all students.
3. **Examination Methodology:** The majority of students find our examination methodology effective. However, we are committed to making our examination process even more dynamic. We plan to review and adjust the examination process based on student feedback. This could include changing the exam format, providing more study materials, or offering additional support for students. This proactive approach will help students feel more confident and achieve better results.
4. **Student Engagement Activities:** The feedback regarding student engagement activities is above average. To make our learning environment even more vibrant, we plan to introduce more interactive and engaging activities. These could include group projects, hands-on experiments, field trips, or guest speakers. By creating a dynamic and interactive learning environment, we aim to enhance the overall learning experience and lead to higher levels of student satisfaction and success.
5. **Infrastructure and Laboratory Facility:** We received mixed responses regarding our infrastructure and laboratory facilities. We see this as an opportunity to energize our learning spaces. We plan to upgrade our facilities and equipment based on
