

## **Orientation programme for the college principals**

On 13/08/2019 , department organized one day orientation programme for the college principals who were implementing the extension activities at college level. This programme was inaugurated by Dr. Ranjan Garge. Hon'ble Vice – Chancellor Prof Promod Yewale presided over the function.

In the beginning Dr. Sanjay Moon in charge – Director of the department felicitated to both the guests He also delivered an introductory speech. He cleared matter of implementation of extension activities at college and social level.

Subsequent to this prof. Garge delivered as inaugural speech. He delivered the lecture on 'Educational problems in Marathwada and its solution'. He explained that Macaulay prepared the educational planning for the India and till today we are implementing it. World Trade organization established in 1/1/1995.

The stress was given on the business of knowledge. The turnover in education was 30 billion dollar in 1999. The business. Of knowledge is very vast. After 1995. the teachers were earning the money through the patients. The first patient started from the Bangalore. Research started as a business. We saw the liberalization and privatization after 1995. NAAC also started from this period. Loyalty, Sincerity and equity come forth to the world. Worldwide competition and NAAC, these two things came in the whole world. Through the induction training the candidates were selected through the interview of 20 to 25 minutes.

Any person from particular culture can be suited in another culture. We must explain our culture properly to others. We must accept the change at first. How to evaluate the teachers? High method is essential for the evaluation of the teachers.

### **Responsibility and authority**

We jump to the authority, avoiding to the responsibility. Everyone loves authority and denies responsibility. We must leave to change our attitude. There should be the co-ordination between university and industry. We must move from what to how. The country which is pioneer in innovation, it is always ahead in each and every sector.

Principals role is very important in educational world. Principals has to study the people as well as education system. We must use word 'inspire' instead of 'manager'. Principals must motivate to others. We must move from 'what to think' to 'How to think'. Work culture is important component for us. We must create our outlook vast. A person who follows the past and makes the future planning, goes always fail. Principal is the backbone of education system.

Hon'ble Vice-Chancellor Prof. Promod yewale delivered the presidential address. He said that after acquiring the freedom. So many people suggested the change in education. Land acquisition was the main issue after the freedom. After this the industrial monopoly came in to the industrial world and these changes we made in education also. The changes started from 1995 in each and every sector and education is not exception for this.

According to Mahe pattern, privatization started in education. That's why the commercialization of education started, and the things extension, equity, employability and excellence come in to forth; our education system is on the second position in the world. In this time, only the qualitative educational institutions would be remained. Globalization cleared that education is a property. Can we forcefully implement the quality in educational System? Our mental change is essential for this.

How must be the Research?

It must be related to the local needs.

Its National and international importance.

Employability-can this education system provides the employability to the youths.

University should not be the only center of convocation but in should be the center of employment. We must be awared about our responsibility while demanding the rights. Our social and economical questions are different. There should be the consistency among the stundents, parents, teaching staff and non-teaching staff. Students must acquired the writing and communication skill in well manner. Rural stndent must be the mentor of education system. There is a need to change the teacher recruitment. Gbloblization is not new for us. We must implement the following courses

Nursing Training course-3to 6 months

Course related to ophthomoligsts.

Hotel management related course

Skill oriented courses

This programme was anchored & vote of thanks was proposed by Dr. Anand Wagh. many principals attended this function.
