The main objective of present investigation is to obtain some Minkowski-type fractional integral inequalities using generalised proportional Hadamard fractional integral operators which is introduced by Rahman et al. in the paper (Certain inequalities via generalized proportional Hadamard fractional integral operators), *Advances in Differential Equations*, 2019, 454(2019). In addition, we establish some other fractional integral inequalities for positive and continuous functions.

Keywords: Minkowski-type fractional integral inequality, generalised proportional Hadamard fractional integral operator
