Brief Report

Dr. Babasaheb Ambedkar Marathwada University, in collaboration with Infosys, Pune, organized a Faculty Development Program (FDP) from August 21 to 30, 2018, aimed at enhancing the skills and knowledge of faculty members from the university and its affiliated colleges. The program was well-publicized and participants were selected through a rigorous application process. The residential program was highly appreciated by the attending faculty members for its content, organization, and the opportunity to gain insights from industry experts. The objectives of the FDP were to equip faculty members with advanced skills and knowledge relevant to contemporary educational and industry practices. It also aimed to align with the 'Skill India' mission, supporting the national initiative to enhance skills among educators, which would benefit students and the broader educational ecosystem. The program also aimed to strengthen the relationship between academia and industry to foster practical learning and real-world applications in education. The organization of the FDP involved meticulous planning and coordination between Dr. Babasaheb Ambedkar Marathwada University and Infosys, Pune. The preparation included the development of a comprehensive curriculum, selection of participants, and logistical arrangements for the residential program. The event involved careful planning and coordination between the university and Infosys, Pune, including the development of a comprehensive curriculum, selection of participants, and logistical arrangements. The FDP spanned ten days and included lectures, hands-on training, workshops, and interactive sessions. The program was designed to provide faculty members with a holistic learning experience, combining theoretical knowledge with practical applications. The program schedule included an inauguration and orientation, keynote speeches on the importance of skill development in education, core skill development sessions, workshops on curriculum design and pedagogical strategies, hands-on training in software tools and applications, industry-academia interaction, and panel discussions on bridging the gap between academia and industry. The feedback from participants was overwhelmingly positive, highlighting the relevance and quality of the program content, the expertise of the trainers, and the overall organization of the event. Participants appreciated the focus on emerging technologies and practical applications, which are directly relevant to their teaching and professional development. The program also facilitated networking among faculty members and industry experts, promoting knowledge exchange and collaboration. The FDP achieved its objectives of skill enhancement, professional development, and fostering industry-academia collaboration. Key outcomes included improved faculty skills, increased industry awareness, and fostered collaboration between the university and

Brief Report

The SEED IT Idol competition was an initiative by Dr. Babasaheb Ambedkar Marathwada University, Aurangabad, aimed at identifying and celebrating the best Information Technology talent among students. The competition brought together participants from various computer science and related departments within the university and its affiliated colleges. It served as a platform for students to showcase their technical skills, creativity, and innovative thinking in the realm of Information Technology. The primary objective of the competition was to identify the best IT brains, encourage innovation and creativity, provide exposure, and enhance career opportunities by highlighting the talents of participants to potential employers and industry professionals.

=====

The event structure and preparation included preliminary rounds, where students participated in quizzes, coding competitions, and technical problem-solving exercises. The top performers from these preliminary rounds were selected for the final competition. The event was structured into various segments such as a technical quiz, a coding challenge, and a problem-solving session. A panel of experienced judges from academia and industry was assembled to evaluate the participants. The event began with a welcome speech by the Director of the Training and Placement Cell, emphasizing the importance of IT skills in today's digital age. Competition segments included a technical quiz, a coding challenge, and a problem-solving session. The event also included interactive sessions for audience engagement and judging and results. The top performers were shortlisted for the final round of evaluation. The SEED IT Idol title was awarded to the top-performing student, along with certificates, trophies, and prizes. Consolation prizes were given to the runners-up and other participants to acknowledge their efforts and participation. The competition successfully identified and celebrated the best IT talent in the region, enhanced skills and confidence, provided exposure to industry experts and potential employers, and increased interest in IT among students. In conclusion, the SEED IT Idol competition was a success, achieving its objectives of identifying the best IT talent in the region and promoting a culture of innovation and excellence among students of University and its affiliated colleges.
