<b>Organized By</b>	<b>National Service Scheme</b>
<b>Student Participated</b>	<b>60</b>

**Brief Report**

The Blood Donation Camp, organized by the National Service Scheme (NSS) unit of Dr. Babasaheb Ambedkar Marathwada University, Aurangabad was a significant initiative aimed at promoting health and community service. Held in collaboration with MIT College, CIDCO; Babaji Mahavidyalay, Kada; and Jalna College of Social Work, the event saw enthusiastic participation from students, faculty, and local residents. With over 130 donors contributing, the camp was a resounding success, highlighting the community's commitment to supporting healthcare needs. The event objectives were to promote blood donation awareness, support healthcare needs, and foster community involvement.

**Moments from the workshop. Unparallel enthusiasm among participants could be observed.**

The NSS unit, in conjunction with the collaborating colleges, meticulously planned the event to ensure smooth execution and maximum participation. Coordination with healthcare providers and local authorities was crucial for the camp's success. Preparatory steps included partnering with local blood banks and hospitals for the collection and safe handling of blood donations. Volunteer mobilization was also conducted through posters, social media, and local media to inform and invite citizens to participate. The event was by

Principals of Respective Colleges in presence of representative of Dr. Babasaheb Ambedkar Marathwada University, who emphasized the importance of blood donation and community service. Participants included students and faculty, local residents, and healthcare professionals. The camp involved a well-organized process to ensure the safety and comfort of donors, as well as the efficient collection and handling of blood donations. Key activities included donor registration, health check-up, blood donation, post-donation care, and educational sessions on the benefits of blood donation and its impact on healthcare. Total donors were over 130, surpassing expectations and contributing significantly to local blood banks. The blood donation camp had a significant positive impact on both the community and healthcare providers. Feedback from participants showed that students and faculty expressed pride in contributing to a life-saving cause, local residents commended the university and collaborating colleges for organizing the camp, and healthcare providers acknowledged the contribution of the collected blood to local healthcare needs. The event had an impact on healthcare, supporting patients undergoing surgeries, cancer treatment, trauma care, and other medical conditions requiring blood transfusions. Increased awareness about the need for regular blood donation and encouraged ongoing participation from the community was achieved. Future plans and recommendations include organizing periodic blood donation camps to ensure a steady supply of blood for local healthcare needs and encouraging regular participation from the community. Conducting educational programs and workshops to promote health awareness and the importance of regular blood donation among students and the community, and strengthening partnerships with local hospitals and blood banks to support ongoing health initiatives and ensure the efficient use of donated blood. In conclusion, the Blood Donation Camp demonstrated the importance of community participation in addressing healthcare challenges and the collective power of community action in addressing critical health challenges.
