Glimpses of Outreach Programme : Start-Up and District Level Boot Camp event of Sub-Campus

The boot camp provided a platform for 45 students to present their start-up ideas and innovations, receiving guidance and mentorship from esteemed members of the assessment team. Winners were selected based on the viability, innovation, and potential impact of their start-up ideas. Deepak Poul, Umesh Dudhbhate, and Shrikant Bikkad emerged victorious, showcasing promising ventures that captured the attention of the assessment team. Awards and recognition were given to winners at various stages, including district, regional, and state levels, celebrating their achievements and encouraging further development of their entrepreneurial ventures. A job fair was organized on 14th October 2022, providing students with opportunities for employment and professional growth. The Principal of the ITI College and the Head of the Department of Management Science at Dr. Babasaheb Ambedkar Marathwada University Sub-Campus in Osmanabad emphasized the importance of cultivating innovation and entrepreneurship in today's dynamic economic landscape. Although, 45 candidates were shortlisted for presenting their ideas, more importantly, this event was highly valuable for nearly 200 students from high school level from the region who attended the entire event. Observing the startup boot camp provides valuable insights into the real-world challenges and triumphs of entrepreneurship. Participants witnessed the journey from idea conception to business development, gaining valuable insights that demystify the startup process. They learnt from the successes and failures of others, recognizing the importance of resilience and adaptability. Such exposure could motivate participants to develop these qualities in themselves, encouraging a shift from a passive to an active approach in their entrepreneurial endeavors. Seeing others take the plunge into entrepreneurship can be inspiring, as successful entrepreneurs are not fundamentally different from themselves. This self-awareness could be guideline for future entrepreneurial pursuits and help identify areas where additional knowledge or partners might be needed. In conclusion, the
