The course syllabus has Applications of Computers as Unit V.

Under the course, handling and use of computers, use of internet in sociological research and use of SPSS as a research tool are covered. The students were given hands-on training on MS-Office, Excel, and Power point presentation. Similarly, they were given training on use of internet for accessing e-journals, open sources, archives, and electronic libraries for research purpose.

In use of SPSS, students were given hands-on training for coding, classification, tabulation and graphical representation of data.

These skills have bearing on employability of students.
