### Socio Economic survey of Waluj MIDC Workers

The concern Survey is depending on primary facts. Primary data collected through Random sampling methods. 200 respondents selected from Waluj MIDC in Aurangabad district. Interview schedules method is used for collection of various dimensions of Socio-economic condition of industrial (laborer)society. Various Industrial plants are main factors are contributing into environmental pollution.

Industrial Laborers are suffering with uncertainty in there jobs. The are not getting sufficient salary. Insecure job and insufficient income leads to many economic and family problems. We found that there is increasing trends in family disputes from same industrial area. The industrial society also facing some industrial problems. On other hand we observed environmental problems including water pollution, ear pollution, noise pollution, public hygienic problem, are burning issues. industrial laborer family These polluting sources are largely affecting the daily life of the residents of the Parli City. There is need to adopt rational government policies regarding employment and pollution control. Industrialist should take environmental care as well as welfare of laborer. The survey has been carried out with the help of the 10 research student. (Deshmukh P.V. Associate Professor, Dept. of Economics) during 5th January to 07 5th January 2015.
