All the successful students were congratulated, by Dr. Sanjay Moon and Dr. Anand Wagh

### 3) Dr. Anand Wagh delivered the lecture on 'Educational development after independence' on Aurangabad Air and it was broadcasted on 12/8/2017 at 9:15 a.m.

### 4) Orientation programme for the college principals

Department organized one day orientation programme on 'The Role of Principals in the development of Marthwada' for the college principals on 29/8/2017. This programme was inaugurated by Hon'ble Vice-chancellor prof. B.A. Chopade. Director of the department Dr. Sanjay Moon presided over the function. Dr. Walmik Sarvade, Prin. Sharad Advant and Dr. Bhalchandra Kango were present on the occasion.

In the beginning Dr. Sanjay Moon delivered an introductory speech. He explained the intention behind organizing this programme. He proposed the importance of the development of the Marathwada through the colleges and universities.

Subsequent to this Prof. B.A. Chopade delivered the lecture. He said that lifelong learning is an integral part of human life. Man learns from birth to death. Our department is well equipped. This department is pioneer in Maharashtra. Education is the base of all the development. Education is available every where

What is mean be lifelong Learning? Learning never ends. We must teach some basic things to the children for e.g. cleaning hands before eating, drinking clean and fresh water. Social reformation is indispensable in the society. We must solve the health problems of the small kids and made a healthy new generation. Water harvesting is the need of time. In London, every person gets only 25 liter water for every day. We are unaware about the water problem. Unless we provide good health facilities to our young generation, we can't expect good education from them. Leaves of Shevga are the best and nutrient diet for our body. We must be awared about drug abuse and alcoholism

The percentage of the cancer is more in the Indian people in comparison with the world. There is a need to eradicate the superstitions. No pains no gains. In the end he said that the role of the principal is a very important in the extension. Each and every college must mention the achievements through the extension in their college reports.

Principal Advant mentioned that Dr. Kango is very active person. His devotion in the development of Marathwada is appreciable. He is a man of devotion, dedication and determination. He is devoted for the well-being of the Marathwada.

subsequent to this Dr. Kango delivered the speech. He said that we have accepted the model of the development. We accepted the American lifestyle and involved in the propaganda of that lifestyle, so we are defeated. Kuba is only 90 K.M. away from the America but their health system is better than the America. Kuba achieved the progress in agriculture, health, science and technology. So we should not have to imitate America.

What is mean by development? The main office of the 'Human development' is established in Aurangabad. This office evaluated the human index. We prepared the model of the development in 1947 and till today we accepted. Without employment, the development is horrible. Workers had lost their jobs and they are wandering without employment in each and every sector. The use of the mechanical instruments is increased day by day. Industrial revolution took place in the Europe. In Europe 5core people died in the war. So the use of mechanical instrument is appropriate but in our country, there is a large population though, we are using mechanical instruments.. There is a need to build up the human oriented development model. If we increase the agriculture production, then we could achieve the development of Marathwada. The new economic policy of the government had stopped the growth of industry. The use of the modern technology in agriculture is the need of time. Israil is the best country in agriculture. Cuba is also ahead in the agriculture. These both countries have open the education to all. We must try for the achievement of the total literacy of Marathwada. If the percentage of the H.B. is less then how can mother give the birth to the healthy child? Thomas Edison achieved the success after the failure of 99 times and in the end he prepared the bulb. Without failure, we can't achieve the success. So fair of failure never touches to the bold heart. Creative activities are benefited. We must accept the

people who have involved in the process of social development. Social reformers must be foliated by us. There is a need to discuss. On the various issues of the Marathwada.

Our agriculture should not be treated secondary. Our agriculture must be handled as an industry. The small farmer in Marathwada is eradicated in new economic policy and so he is moved to the city. In America Minimum payment factor is important. When we study the employment scenario in America, we find that the industrial growth of employment is decreasing and the employment from self industry is growing. In America till the std. XII, education is free. In Germany till the Ph.D. education is free. We must spend at least 6% amount on the education and this demand must be done by the university professors. Now in these days the universities are in the critical position. Education should be development oriented. Development is a continuous process. We all must bound to the concept of the development. The total development of the Marathwada is depending upon the agriculture.

After this Dr. Kamlakar Kamble, Principal, Kholeshwar college, Ambajogai expressed his views about the development of Marathwada he said that all the educational problems in Marathwada should be discussed, Marathi university must be established in Ambajogai. Separate universities should be started at Latur and Osmanabad. Education, health, information technology and agriculture should have to inculcate in the definition of the development. Marathwada should have to be independent as Vidarbh.

Prin. Advant delivered once again speech. He said that principal is the backbone of the college. Principal is always far away from the process of the development. All the education trustis are not positive about the of the Marthwada is not satisfactory. In the beginning all the teachers in Marthwada were form outside and their medium of teaching

was English and our medium was Urdu. So there was a gap between teaching and learning.

From 1990, the education is not affordable to the common people. So we are not ahead in higher education. That's why education system should be independent for the Marathwada our universities must be framed the syllabus which would be related to the problems of the common people.

Following are the major issues in higher education of the Marathwada

- 1) Duplicate attendance
- 2) Mass copy
- 3) Extra permissions for new colleges

This programme was anchored by Dr. Anand Wagh and vote of thanks was proposed by Dr. Sanjay Moon.

5) Dr. Anand Wagh

Hon'ble Vice-Chancellor Prof. B.A. Chopade nominated Dr. Anand Wagh as NSS programme officer for coming three years from August 2017.

He was congratulated by Dr. Sanjay Moon, Head & Director.

- 6) Dr. Anand Wagh, Aast. Professor completed the short term course o 'Gender Sensitization' from 11/9/2017 to 16/9/2017. This course was organized by H.D.C. U.G.C. Dr. B.A. M.U. Aurangabad.

**7) Orientation programme for the students volunteers**

On 26/9/2017, department organized one day training programme for the college students volunteers. This programme was inaugurated by Dr. Nandkumar Rathi, In charge Finance and Accounts Officer. Director and Head of the department Dr. Sanjay Moon presided over the function.

Dr. Rathi delivered the lecture on 'Role of youths in the development. of Marathwada' He said that the role of the youths is
